

# Q-SERIES

# CONSTRUCTION

You can rest easy knowing that every Alps spa is constructed from the finest materials available. Insulated paneling, ABS floor system, ABS backed acrylic shell and a G90 galvanized steel frame are all standard on every Alps spa created.

## G90 GALVANIZED STEEL FRAME

All of our spas are fitted with G90 galvanized frames. These frames are 30% lighter and up to 150% stronger than traditional wooden frames. Warping, rotting and rusting are issues that you will not have to concern yourself with when owning an Alps Spa.

## TRI-LAYERED SYNTHETIC PANELING

The cabinet is one of the most important components of any hot tub. Each layer of our panels serves a specific purpose. We start with your choice of three different colors of synthetic skirting for long lasting beauty without the maintenance. We then add a 3/4" thick piece of foam to strengthen the panel and retain the heat inside the spa. Lastly, the panel is backed with an aluminum barrier that reflects the thermal heat back to the spa for optimal energy efficiency.

## ACRYLIC SHELL CONSTRUCTION

Our shells are constructed from .275 ABS backed acrylic. It is then backed by environmentally safe acrylic bond material. This process takes longer than the conventional way of backing with fiberglass material, but provides a superior bond and is environmentally safe.

## ABS FLOOR/PAN SYSTEM

A vacuum formed ABS floor is created for all of our spas. The bottom is totally impervious to water, dirt and insects. An external main drain is located on the side of the pan for easy access when draining.

## ACRYLIC SHELL COLORS

Sterling Marble

Tuscan Sun

Inca Gold

Tourmaline

Pearl Shadow

## CABINET COLORS

Coastal Grey

Mahogany

American Cherry

## SPECIFICATIONS

51 - Hydrotherapy Jets / Seating 5 people / 340 Gallons

### Dimensions / Weights

- 84" x 84" x 35" (H)  
2.14m x 2.14m x .89m (H)
- Dry weight: 700 lbs / 317.6 kg
- Fill weight: 3367 lbs / 1527.3 kg

### Standard Features

- Balboa® VS-511 control system
- Balboa® CD ozone
- 5.5 kw heater
- 2 Vico Super Flo dual speed pump
- 10 bulb LED light
- 11" cascading LED lighted waterfall
- 4 LED lighted air controls
- 1 LED lighted waterfall control valve
- 100 SqFt LED lighted filter
- G90 galvanized steel frame

### Optional Features

- Bluetooth stereo w/MP3 plug-in
- Water Management Ionizer System
- BP 2000 Control System  
( Smart Phone and iPhone control )
- 24 hour circulation pump  
( California Energy Approved )

### Lounge

- 2 - upper neck jets
- 3 - 4" roto jets ( bearingless )
- 2 - hip jets
- 6 - calf jets
- 2 - foot jets

Lounge

### Hot Seat

- 2 - upper neck jets
- 9 - direct pressure jets
- 2 - hip jets
- 2 - hand jets

Hot Seat

### Swing Seat

- 2 - upper neck jets
- 2 - 5" swirl jets
- 3 - vertical lava jets
- 2 - hip jets
